

Support for Removing a Lane North of Montrose by Zip Code*

North Lake Shore Drive Survey Results

Q14 North of Montrose Avenue, reducing the number of vehicle lanes on North Lake Shore Drive from four to three in each direction is a good idea.

* Zip codes included in this map are those which contain a statistically significant number of responses. This was determined by calculating the number of responses needed to be considered a statistically significant sample of each zip code, based on the zip code's total population. If the number of responses received within a zip code was greater than its statistically significant sample size, the zip code and associated responses were included in the map.

**Weighted averages were calculated by determining the sum value of all response values, weighted from 1 to 5 depending on degree of disagreement to agreement respectively, from a given zip code. This sum was then divided by the number of applicable responses within the same zip code. This resulted in an overall value for each zip code representing the general level of agreement with each statement.
