This map identifies the proposed improvements that received the largest number of interactions on the mapping tool during the Public Input Opportunity. Participants were able to like, dislike, and/or comment on the various designs to provide input directly to the project team. The Public Input Opportunity took place from September 28, 2020 to November 9, 2020.

Please note that all comments have been provided on the Essential Alternative map for ease of review. The proposed improvement call-outs represent features that are common to all alternatives.
